Powder grinder machine

Powder grinder machine, efficient grinding, quality assurance

- Fine grinding
- Smooth operation
- Simple structure
- High output powder speed

Flour mill series

Powder grinder machine >

Cassava flour grinding mill >

Introduction

The powder grinder machine utilizes the relative movement between the movable toothed disc and the fixed toothed disc to crush the material through the impact, friction, shearing of the toothed disc, and the impact of the materials on each other. The fineness of material crushing can be adjusted through the pore size of the screen. The whole powder grinder machine is designed according to GMP standard and made of stainless steel. The structure of powder grinder machine is simple, low energy consumption and easy to clean. The powder grinder machine is an ideal crushing equipment at present.

Application

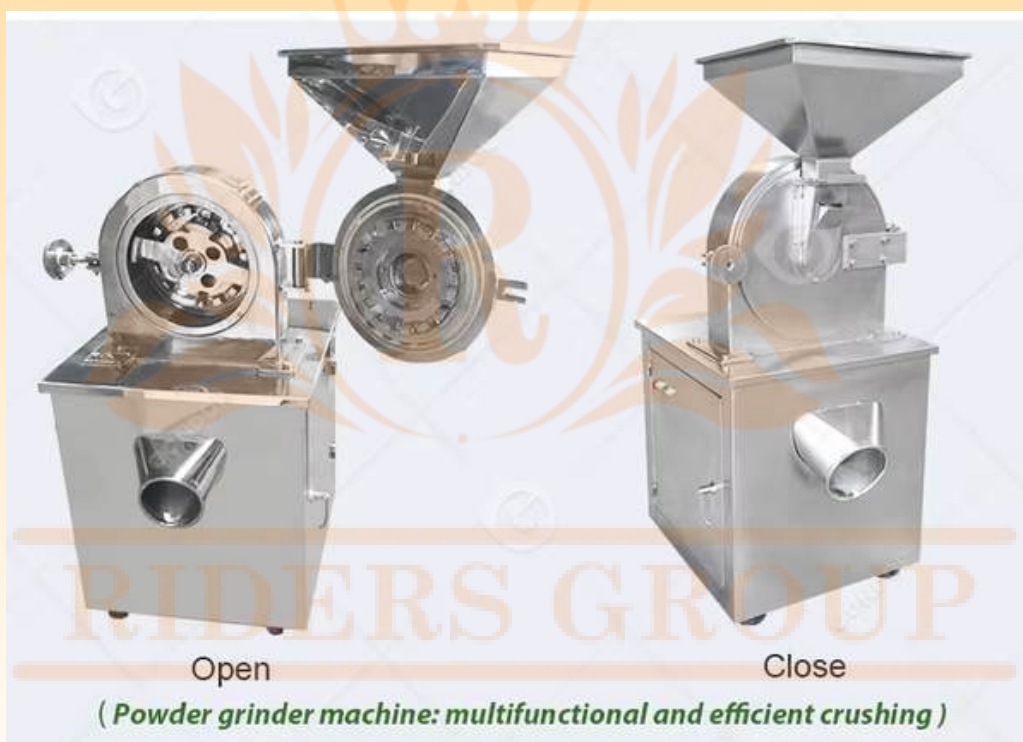

1. The powder grinder machine is suitable for industries such as chemical industry, food, agriculture and food, especially suitable for crushing dry and brittle materials, and has a wide range of uses.
2. The powder grinder machine is suitable for all kinds of spices, grains, general chemical raw materials, etc.

FEATURES

1. Simple structure, stable operation, low noise, low energy consumption.
2. Fast and efficient crushing and will not raise dust when working.
3. The fineness of material crushing can be adjusted through the aperture of the screen.
4. The inner wall of the casing is smooth, no powder accumulation, easy cleaning.
